Notification Date: August 31, 2018

This brief serves as formal notification that the following products have reached their **End Of Life (EOL):**

PRODUCT(S) AFFECTED:	PART NUMBER(S): ("X" denotes all versions)	Availability
ADLQM67PC	292600, 292602, 292604, 292606, 292608, 292609	Call for availability after LTB date
ADLQM67HDS	294856, 294857, 294858, 294859	Call for availability after LTB date
ADL3GQM67HDS	292870, 292871	Call for availability after LTB date

LAST TIME BUY (LTB): October 16, 2018	**LAST TIME DELIVERY (LTD):** Call
PRODUCT MANAGER: JC Ramirez	**EOL EFFECTIVE DATE:** August 31, 2018

REASON(S) FOR END OF LIFE (EOL):

The Intel QM67 chipset as well as 2nd Gen Intel Core 2600-series processors have now reached their End of Life (EOL) which directly impacts the availability of all Intel QM67 related products including PC/104 ADLQM76PC as well as 3.5" ADLQM67HDS and ADL3GQM67HDS SBCs. Customers wishing to purchase the ADLD25PC after this date should call ADL Embedded Solutions, Inc. for status, but availability is not guaranteed and is dependent on remaining assembled inventory and/or remaining processor and chipset availability from distributors.

All LTB orders are NON-CANCELLABLE and NON-RETURNABLE. LTB products will be honored under their existing warranty policy. At our discretion, products will be repaired, replaced or credited with an equal or better product during the warranty period. All LTB's are allocated on a first-come, first-served basis so prompt attention to this notice is strongly advised.

SHIPPING BEYOND END OF LIFE

In some cases, a customer program may be adversely affected by a product obsolescence, which would result in loss of revenue. We understands this issue and are committed to helping our customers continue within their long-running programs. Product EOL is often a result of one or more major components that have reached the end of their life cycles with the component manufacturer. Last time buys are a reflection of how many of the obsolesced components either remain readily available.

There are instances when a customer could continue their programs beyond end of life. This may involve active customer participation in the procurement of the obsolesced components, as mandated by their backlog and forecasts, to ensure the right amount of components are secured prior to LTB. There are also additional considerations regarding production of boards and delivery schedules. For example, component shelf life can be a major factor in the amount of time a product can be delivered. Please contact your sales engineer for more details.

RECOMMENDED PRODUCT MIGRATION PATH:

We are committed to offering our customers a path for migration to new products that will fully meet their needs. Wherever possible, we will provide product recommendations based on parallel or superior features from the customer's current solution.

Product Name	Description	Remarks	Availability
ADLQM87PC	PCIe/104 4th Gen Intel Core SBC	Intel Codename Haswell	In Production
ADLQ170HDS	3.5" 6th Gen Intel Core SBC	Intel Codename Skylake	In Production
